## **VAHAMSEA CONFERENCE SESSIONS DESCRIPTION**

### **“The Challenge for Change”**

**Dr. Carol Cash**

How has March 13, 2020 changed you as an educator? What obstacles and challenges have you had to overcome? What is education going to look like as we emerge from COVID-19? Dr. Carol Cash , a professor and Program Leader for Educational Leadership at Virginia Tech, will address changes in pedagogy, steps to meet the new challenges, and ways to move forward to a brighter future.

### **“Helping Students to Overcome the Challenge of Transitioning to In Person Learning and Identifying at Risk Students”**

The pandemic has been a challenge to both students and educators. The adjustments to the virtual world was smooth for some students and difficult for others. As we transition back to in person learning, some students may thrive and others may struggle. This session will provide teachers with the tools to help to ease students back to in person learning and help to identify those who are having difficulty.

### **“HOSA-Ready for Take-off!”**

**Jane Best, BSN, MS, Ed., Virginia HOSA State Specialist**

This session will help you understand the essential building materials of Virginia HOSA and how Virginia HOSA can help you build the best career and technical student organization by utilizing tools to help your students achieve their goals and have the most successful year ever!

## **“A Picture of An Educational Journey”**

**Christina Thomas, MSN, RN**

This session will demonstrate how to help students develop portfolios as a showcase tool of their comprehensive coursework. Corporations, organizations, and networking platforms are anticipating these during job fairs and interviews.

## **“Interactive Engagement for Today’s Student”**

**Amy Buchanan**

This session will provide educators with new and interactive teaching tools to engage the twenty-first century learner. Teaching virtually has pushed educators to find and create new interactive ways to deliver content that will keep the student engaged in their learning.

## **“Caring for Our Body Ourselves”**

This session will provide educators with various strategies to support their own health and emotional well being. It is key for educators to care for themselves in order to give back to their students.

## **“Sky’s the Limit for New Teachers”**

**Jan Rayl, BSN, RN, CRNI**

This session is for the new teacher, and year 1 or 2. If you are new to CTE (Career and Technical Education) or new to teaching this class is for you. Will give you interactive resources for Health and Medical Sciences Instructors. You will learn where to find what you need to teach for your specific classes. Come and get answers to the questions you did not know you had!

## **REVIVE**

**Christina Thomas, MSN, RN**

“ Revive! Opioid Naloxone Training provides the participant an opportunity to learn how opioid overdoses happen and how naloxone works; learn how to recognize overdoses, risk factors for overdoses, and myths about overdose reversal; and learn how to administer naloxone.”
